Women's History Month Spotlight

Anne Seibert

Area of Practice

I am the Director of Nursing at Bethesda Butler Hospital, responsible for the clinical care and outcomes for the hospital.

Education and Experience

I have a Master's Degree in Nursing Administration, and I am also Board Certified as a Nurse Executive. I started as a PCA at Bethesda North while in Nursing School 26 years ago and have been with TriHealth ever since.

How did you know you were ready to step into a leadership position?

I have always been interested in improving processes and assisting with change that positively affects our patients and the teams serving them. An Assistant Nurse Manager job became available, and I was encouraged to apply by my Nurse Manager and that was my first 'official' management role.
